This document details:

Services Capability

Contact Details

1 CAPABILITY

Smith EMS Pty Ltd provides all levels of supplementary engineering labour, from general administrative support through to statutory coverage. The following service levels are available. The level and nature of services provided are agreed to prior to engagement.

3D Printing, CAD Services and Aerial Imagery (CASA registered)

Offered as a 'value add' services to compliment all other service levels, SEMS can provide 3D printing, 2D or 3D CAD services, and aerial photography and video imagery. These services would generally be minor in nature.

Engineering Labour (ie, Support / General Administration)

Services provided under this category are typically supplementary labour to support clients existing processes and management systems. While work is carried out autonomously, direction and accountability falls with the Principal.

Process Management and Facilitation – including ICAM, RCA, FMEA, WRAC

This service is offered to provide the organisation and facilitation of structured processes such as Risk Assessments, FMEA, RCM etc. This rate typically utilises the Principal's existing processes and documentation. (however new processes can be tailored to suit needs)

Professional Engineering Services

Any service as provided in which a high level of skill and experience is required. These services may include process development, project management, technical evaluation and failure analysis etc. These services are determined and agreed to on a per project basis.

Statutory Coverage (NSW Coal Mines Mechanical Engineering Management)

This service level applies to supplementary labour being provided to fill the legislative requirements for a *Mechanical Engineers / Manager of Mechanical Engineering*. *Smith EMS Pty Ltd* would provide an Engineer / Manager holding a suitable NSW Practising Certificate, being for underground coal mines and / or surface operations.
